

INDIVIDUAL CONTROLLERS

Design wired remote controller

CZ-RTC5B

- Power consumption monitor (only for PACi)
- Flat face design & Touch sensor switch for stylish design and operating usability
- New functions such as for Energy saving & monitoring and for Service use are available on the Full dot LCD (3,5" display)
- Improved illumination
- White LED backlight
- Blink when alarm occurs

datanavi

- Scan & Save AC system info
- Easy access to manual database
- Commissioning, F gas check data history

* Panasonic App is required on your smartphone.

Basic Operation.

- Operation • Mode • Temperature setting • Airflow volume
- Airflow direction

Timer function.

- Outing function • Weekly Program timer • Easy ON/OFF timer
- Time display

Energy saving.

- Outing function • Temperature setting range limitation
- Temperature auto return • OFF remind • Schedule demand control • Energy saving mode • Energy monitoring

Others.

- Key lock • Ventilation fan control • Display contrast adjustment
- Remote controller sensor • Quiet operation mode • Prohibit setting control from Central controller • Rotation / Back up control

* Power consumption monitoring is available for all PACi systems except R410A PACi Standard.

* Rotation and backup control with CZ-RTC5B is available for all PACi systems.

New wired remote controller - CZ-RTC6 / CZ-RTC6BL / CZ-RTC6BLW

Panasonic has developed the new wired remote controller to meet the modern control needs. The controller provides great accessibility and convenient tools in a stylish design. From residential to commercial, the wired remote controller series perfectly matches with all kinds of modern building.

Comfort Cloud

H&C Control App

H&C Diagnosis App

Intuitive control with stylish design profile.

- Simple operation at a glance
- Clean face with full flat & black LCD display
- Compact body only 86x86

Comfort control with your smartphone for multi users.

- H&C Control App for daily remote control operation
- Comfort Cloud App for remote operation 24/7/365

Easy maintenance with service support App.

- Quick and easy App set-up for system setting
- H&C Diagnosis App enables the user to obtain detailed system operation data

Wired remote controller (for Floor Standing (P1) indoor units)

CZ-RTC2

- Time Function 24 hours real time clock (week day indicator)
- Weekly programme function (a maximum of 6 actions can be programmed for each day)
- Sleeping function (this function controls the room temperature for comfortable sleeping)
- Maximum 8 indoor units can be controlled from one remote controller
- Remote controller by main remote controller and sub controller is possible (maximum 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit)

- Possible to connect to the outdoor unit using PAW-MRC cable for servicing purposes
- Outing function (this function can prevent the room temperature from dropping or rising when the occupants are out for a long time)

Basic remote controller ON/OFF.

- Operation mode changeover (Cooling, Heating, Dry, Auto, Fan)
- Temperature setting (Cooling / Dry: 18-30°C Heating: 16-30°C)
- Fan speed setting High / Medium / Low and Auto
- Air flow direction adjustment
- Dimensions (H x W x D): 120 x 120 x 16mm

Infrared remote controller

CZ-RWS3 + CZ-RWRU3
For 4 Way 90x90 Cassette.

CZ-RWS3
For Wall Mounted and 4 Way 60x60
(with CZ-KPY3AW).

CZ-RWS3 + CZ-RWRL3
For 2 Way Cassette.

CZ-RWS3 + CZ-RWRD3
For 1 Way Cassette.

CZ-RWS3 + CZ-RWRT3
For Ceiling.

CZ-RWS3 + CZ-RWRC3
For all indoor units.

CZ-RWS3 + CZ-RWRU3 // CZ-RWS3 // CZ-RWS3 + CZ-RWRL3 // CZ-RWS3 + CZ-RWRD3 // CZ-RWS3 + CZ-RWRT3 // CZ-RWS3 + CZ-RWRC3

- Easy installation for the 4 Way cassette type simply by replacing the corner part
- 24 hour timer function
- Remote controller by main remote controller and sub controller is possible (Max. 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit)

- When CZ-RWS3 is used, infrared control becomes possible for all indoor units (1: when a separate receiver is set up in a different room, control from that room also becomes possible. 2: automatic operation by means of the emergency operation button is possible even when the remote controller has been lost or the batteries have been exhausted)
- Operation of separate energy recovery ventilators (When commercial ventilation fans or heat-exchange ventilation fans have been installed, they can be operated with this remote controller (interlocked operation with the indoor unit or independent ventilation ON/OFF))

Simplified remote controller. Quick and easy operation

CZ-RE2C2. A remote controller with simple functions and basic operation.

- Suitable for open rooms or hotels where detailed functions are not required
- ON/OFF, operation mode switching, temperature setting, air speed switching, air flow direction setting, alarm display, and remote controller self-diagnosis can be performed

- Batch group control for up to 8 indoor units
- Remote controller by main remote controller and sub controller is possible with a simplified remote controller or a wired remote controller (up to two units)
- Dimensions (H x W x D): 120 x 70 x 16mm

Remote sensor

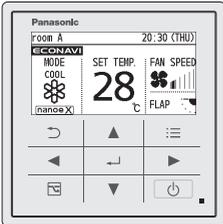

CZ-CSRC3

- This remote sensor can be connected to any indoor unit. Please use it to detect the room temperature when no remote controller sensor or body sensor is used (connection to a system without a remote controller is possible)
- For joint use with a remote controller switch, use the remote controller switch as main remote controller
- Batch group control for up to 8 indoor units

- Appearance design based on simplified remote controller chassis
- Dimensions (H x W x D): 120 x 70 x 17mm
- Weight: 70g
- Temperature/Humidity range: 0°C to 40°C / 20 % to 80 % (no condensation) (indoor use only)
- Power Source: DC16V (supplied from indoor unit)
- Maximum number of connectable indoor units: Up to 8 units

Safety Precautions

WARNING

This symbol refers to a hazard or unsafe practice which can result in severe personal injury or death.

CAUTION

This symbol refers to a hazard or unsafe practice which can result in personal injury or product or property damage.

Matters to be observed

Prohibited matters

WARNING

Do not use this appliance in a potentially explosive atmosphere.

In case of malfunction of this appliance, do not repair by yourself. Contact the sales or service dealer for repair and disposal.

In case of emergency, remove the power plug from the socket or switch off the circuit breaker or the means by which the system is isolated from the mains power.

CAUTIONS

This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial use by lay persons.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

- Do not operate with wet hands.
- Do not wash with water.

Note:

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- FCC Caution: To assure continued compliance, follow the attached installation instructions. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Thank you for purchasing the Panasonic high-spec wired remote controller.

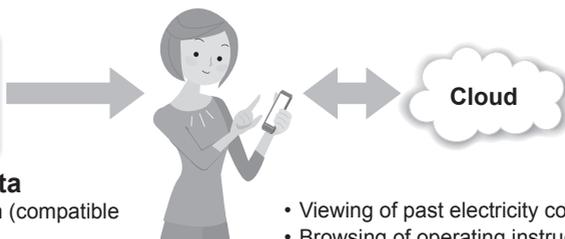

- Read the Operating Instructions carefully for safe use. This manual describes the Operating Instructions of the wired remote controller. Read this manual as well as operating instructions supplied with indoor units and outdoor units.
- **Be sure to read the “Safety Precautions” (P.2, 3) before using.**
- Keep this manual with operating instructions supplied with indoor units and outdoor units in a safe place.
- Be sure to keep this manual in a place easily accessible by users. In the case of user change, be sure to give this manual to the new user.

NOTICE

The English text is the original instructions. Other languages are translation of the original instructions.

datanavi

Provide seamless support by saving data about the air conditioners in the cloud using the smartphone app.

Air conditioner data

- Electricity consumption (compatible models only)
- Model
- Alarm information, etc.

- Viewing of past electricity consumption
- Browsing of operating instructions
- Communication of alarm information

● Service offering storage of electricity consumption data

Utilize electricity consumption data saved in the cloud for energy-saving activities

● Support for browsing operating instructions

Browse the operating instructions for the remote controller and connected units on your smartphone with ease

● Support with simple solutions when you have a problem

Rapid response when an error occurs.

Menu screen (P.10)

Operation guide The currently operable content is displayed.

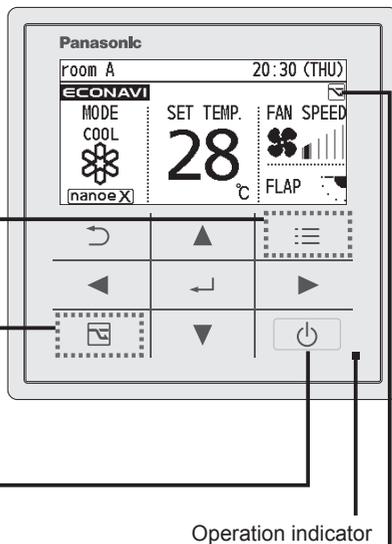

- ▲▼◀▶: Cross key buttons
- : Enter button

Basic Operations

1 Start operation.

Press .
(The operation indicator illuminates.)

- **To change the setting**
(P.10)
- **To turn the energy saving operation ON/OFF**
Press during operation.
(Only for models equipped with the energy saving function.)
- **Start/Stop**

2 Select the item to set.

Press  .

Energy saving operation is in process.

3 Change the setting.

Press    .

(The cursor disappears.)

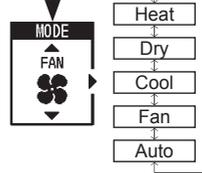

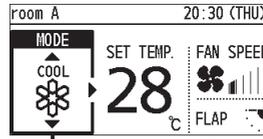

Note

- Operation modes that cannot be set are not displayed.
- The swing and airflow direction on the remote control is not synchronised with the flap movement.
- The flap display differs from the actual flap angle.
- Pressing  after recovery from mains power failure will resume operation with the contents before mains power failure has occurred.
- If no operation is performed for a certain period of time, the backlight turns off to save electricity. (Press any button for illumination.)
- The energy saving operation restricts the maximum current value, resulting in decreased cooling/heating performance.
(If the current of outdoor units does not reach the peak due to low load operation, the current value is not restricted.)
- For models that cannot change the airflow direction, the airflow direction is not displayed.
- When restricting the set temperature range (P.31)
- The fan speed and airflow direction in cooling/drying operation can be adjusted with 3 levels if controlling using one remote controller while assigning an indoor unit (e.g. ceiling-hung type) which has a 3-level adjustment of fan speed and airflow direction in cooling / drying operation as main unit, and assigning a 4-way ceiling cassette type as sub unit.

Perform the following operations in step 2 on page 8.

■ Operation mode (e.g. Cool, Heat, etc.)

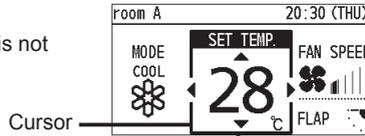

Press ◀.

*Auto:
The mode is automatically switched to Cool or Heat to achieve the set temperature.

■ Set temperature

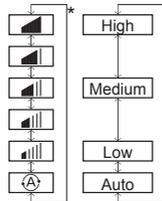

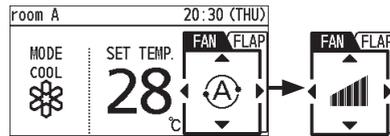

Press ↵. (When the cursor is not visible)

- Cool/Dry: 18 °C to 30 °C
- Heat : 16 °C to 30 °C
- Auto : 17 °C to 27 °C

■ Fan speed

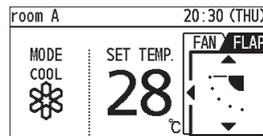

Press ▶.

- *Depending on the model, either of the displays appears.
- *Auto: Cannot be selected in Fan mode.
- *Depending on the model, selectable airflow directions may differ.

■ Flap

Press ▶ 2 times.

- ◀ : Swing
- Pressing ▲▼ during swing can stop the flap at your preferred position.

■ Flap Setting for Each Indoor Unit (P.12)

Menu List

1 Display the menu screen.

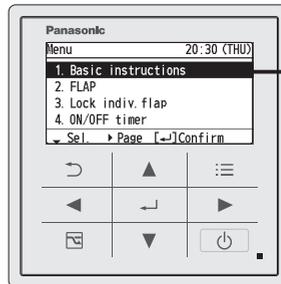

- To return to the previous screen

Press .

- When no operation is performed in each setting screen for several minutes

The display returns to the top screen.

Flap Setting for Each Indoor Unit FLAP

e.g. unit 1-1

e.g. unit 1-3

When setting flaps for each indoor unit

- Flaps of all air outlets of 1 indoor unit face the same direction.

1 Display the menu screen.

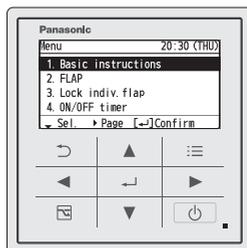

■ To return to the previous screen

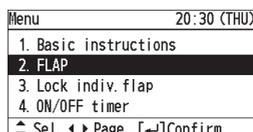

Press .

■ To return to the top screen

Press 2 times.

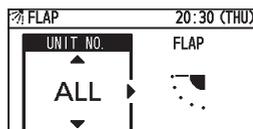

2 Select [FLAP].

3 Select the indoor unit to set.

- ALL: All units connected to the remote controller

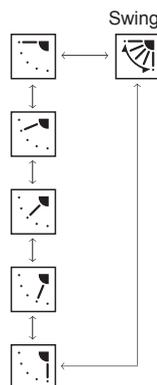

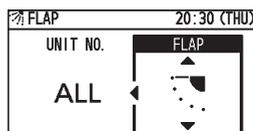

e.g. (unit) ALL → 1-1 → 1-2 to 1-8

4 Select the flap direction.

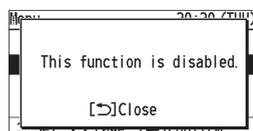

(Press 2 times to finish.)

- Pressing or during swing can stop the flap at your preferred position.
- Pressing or while swing is stopped sets the flap at the specified position.
- Depending on the model, the specifications may differ. (The swing operation is unavailable, or the airflow direction cannot be changed, and "This function is disabled" is displayed./Depending on the model, the airflow is adjusted with 3 levels in the cooling operation of Auto mode.)

Note

- If the function is not fitted, the display shown on the right appears and this function cannot be used.

Flap Setting for Each Air Outlet

Lock individual flap
(Lock indiv. flap)

When setting the flap for each air outlet individually according to the room condition

- Even if the flap setting of all indoor units (P.9) or each indoor unit (P.12) is changed, the flap directions set here are not changed.

1 Display the menu screen.

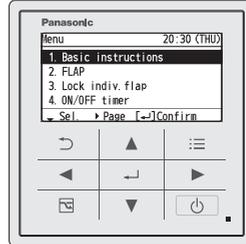

■ To return to the previous screen

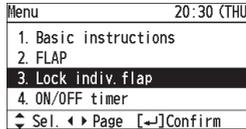

Press

■ To return to the top screen

Press 2 times.

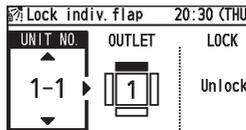

2 Select [Lock indiv. flap].

3 Select the indoor unit to set.

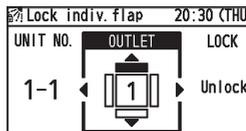

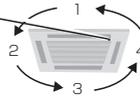

e.g. 1-1 → 1-2 to 1-8

4 Select the air outlet.

- The square mark (indented □) on the panel of the indoor unit indicates air outlet No. 1. There are some models that do not have a square mark (indented □).
- The air outlet No. changes according to the installation direction. Check by actual operation.
- ALL: All the air outlets

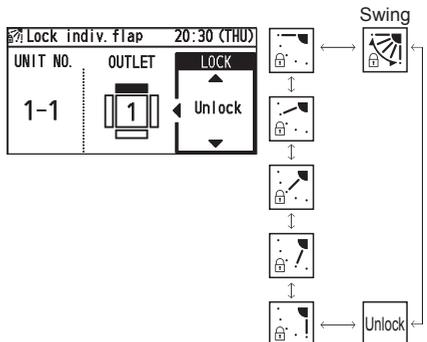

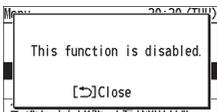

5 Select the flap direction.

(Press 2 times to finish.)

- * For types other than the 4-way cassette type, the following display appears and this function cannot be used.

Timer Reservation ON/OFF timer

This turns ON/OFF at the specified time. (e.g. Turning ON/OFF after 3 hours)

- Use OFF timer for example when: Reducing electric consumption while sleeping
- Use ON timer for example when: Operating the air conditioner according to the meeting start time.

1 Display the menu screen.

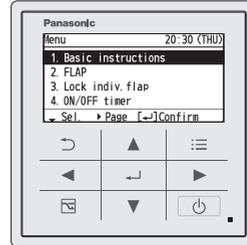

■ To return to the previous screen

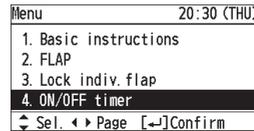

Press

■ To return to the top screen

Press 2 times.

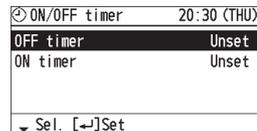

2 Select [ON/OFF timer].

3 Select the timer type.

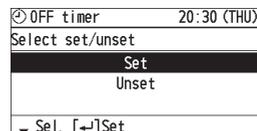

- Select [OFF timer] or [ON timer].

4 Select [Set].

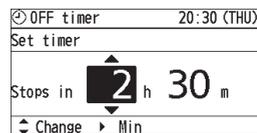

- To set the timer to OFF, select [Unset].

5 Set the time.

(Press 2 times to finish.)

- Upper limit: Stops in 72 h. (by the 30 minutes)

Note

- If ON timer and OFF timer are set to the same time, priority is given to OFF timer, and ON timer cannot be used.

Timer Reservation Weekly timer overview

You can set a weekly operation schedule.

- The operation ON/OFF schedule or temperature setting schedule can be set by setting the day and time (e.g. Setting the operation start time to 8:00 a.m. from every Monday to Friday.).

How to set (Overview)

- Select **"Day"**
- Select **"Time"**
- * Select **"Operation"**
- Select **"Temperature"**
(Only for operations other than ON/OFF)

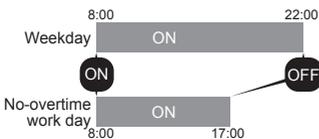

Weekly timer		20:30 (THU)	
Day	SUN	MON	TUE WED THU FRI SAT
1.	10:00	ON	26°C
2.	17:00	OFF	
3.	--:--	---	--°C
◀ ▶ Day [↔] Register			

(See P.16 for setting procedure)

- ***Operation**
 - ON**: Starts operation with the temperature set last.
 - OFF**: Stops operation.
 - ON & TEMP**: Starts operation with the specified temperature.
 - TEMP**: Sets the temperature to the specified temperature during operation.

Combination examples

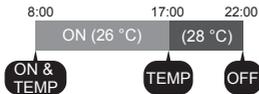

■ 1. Stop operation earlier on "No-overtime work day".

Weekly timer		20:30 (THU)	
Day	SUN	MON	TUE WED THU FRI SAT
1.	8:00	ON	
2.	17:00	OFF	
3.	--:--	---	--°C
◀ ▶ Day [↔] Register			

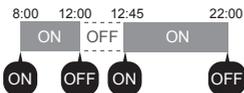

- The setting registered for 1 day can be copied to other days. (P.19)

■ 2. Set the temperature higher after the fixed time.

Weekly timer		20:30 (THU)	
Day	SUN	MON	TUE WED THU FRI SAT
1.	8:00	ON	26°C
2.	17:00	OFF	28°C
3.	22:00	OFF	
◀ ▶ Day [↔] Register			

■ 3. Stop operation during lunch break.

Weekly timer		20:30 (THU)	
Day	SUN	MON	TUE WED THU FRI SAT
1.	8:00	ON	
2.	12:00	OFF	
3.	12:45	ON	
◀ ▶ Day [↔] Register			

■ 4. This Thursday is a holiday.

The timer can be disabled only for the specified days with the registered schedules kept. (P.16)

- Disable (☐) the timer of the specific Thursday which falls on a holiday.
- Enable (☑) the timer after the holiday is over.

Timer Reservation Weekly timer continued

Timer copy

The registered schedule can be copied to other days.
This is convenient to apply the same schedule to multiple days.

1 Display the menu screen.

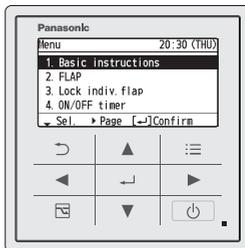

■ To return to the previous screen

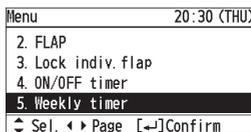

Press .

■ To return to the top screen

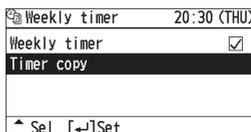

Press 2 times.

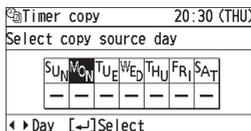

2 Select [Weekly timer].

3 Select [Timer copy].

4 Select the copy source day.

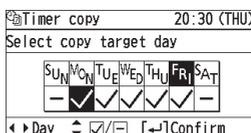

5 Select for all copy target days.

- Select the days with and select with .

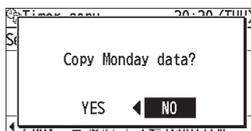

- : Copy source

6 Select [YES].

(Press 2 times to finish.)

Filter Information

1 Display the menu screen.

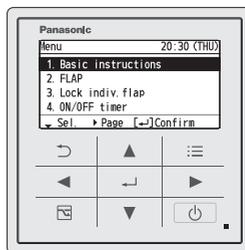

- **To return to the previous screen**

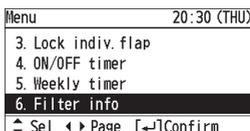

Press .

- **To return to the top screen**

Press 2 times.

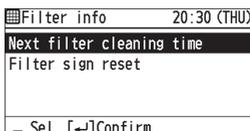

2 Select the item to set.

Filter information

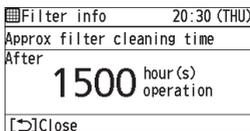

3 Select [Next filter cleaning time].

4 Confirm the operation time to the next cleaning.

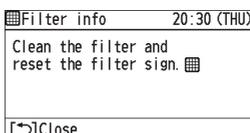

(Press 2 times to finish.)

- **When cleaning is immediately necessary**

The screen shown on the right is displayed. Clean the filter.
(See operating instructions of the indoor unit.)

- **After the filter is cleaned**
Select [Filter sign reset] in step 3 above and select [YES].

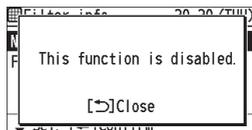

(Press 2 times to finish.)

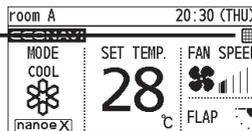

(The filter cleaning time count is reset.)

Note

- If the function is not fitted, the display shown on the right appears and this function cannot be used.

- When the cleaning time comes, the icon shown on the right appears on the top screen.

Quiet Operation/Power Consumption Monitor

1 Display the menu screen.

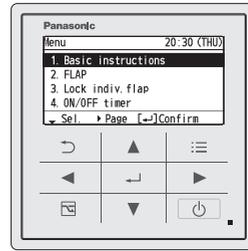

■ To return to the previous screen

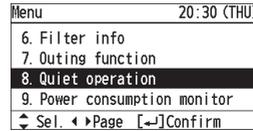

Press .

■ To return to the top screen

Press 2 times.

2 Select the item to set.

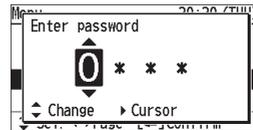

Quiet operation

3 Enter the password.

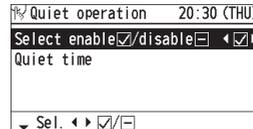

(Repeat)

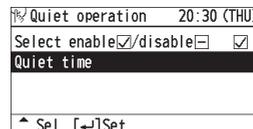

4 Set [Select enable/disable] to .

• Select the item with and select / with .

5 Select [Quiet time].

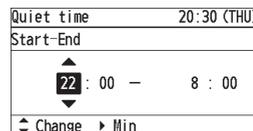

6 Set the time to perform quiet operation.

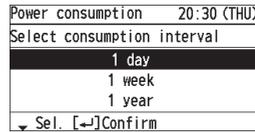

(Repeat)

(Press 2 times to finish.)

Power consumption monitor

3 Select the period to display.

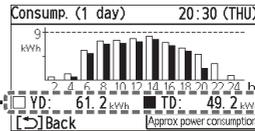

4 Confirm the information.

☰ (Press 2 times to finish.)

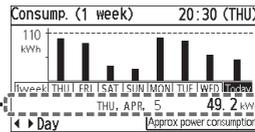

- 1 day

Power consumption (approx.)

- 1 week

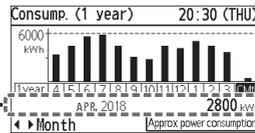

Power consumption (approx.)

- Pressing ◀▶ can switch data of 1-week total and data of each day.

- 1 year

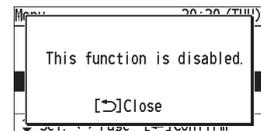

Power consumption (approx.)

- Pressing ◀▶ can switch data of 1-year total and data of each month.

Note

- An administrator password is required to use quiet operation. (P.43)
- If the function is not fitted, the display shown on the right appears and this function cannot be used.

- Using the quiet operation function may deteriorate the performance to reduce the operation sound.
- The power consumption shows an approximate calculation result, which may differ from the measurement result calculated by a power meter.

Energy Saving

■ ECONAVI

This function is available by attaching an optional ECONAVI sensor. The ECONAVI sensor detects human activity and conserves energy based on the activity level.

WARNING

Do not use the ECONAVI function in a room with disabled persons or infants only. Due to their limited motions, the ECONAVI sensor may judge no person is present, causing the indoor unit to stop the operation.

Overview of the ECONAVI function

<p>High activity</p>	<ul style="list-style-type: none"> • Cooling: Target temperature is the same as the set temperature. • Heating: Target temperature is 1 °C lower than the set temperature.
<p>Low activity</p>	<ul style="list-style-type: none"> • Cooling: Target temperature is 1 °C higher than the set temperature. • Heating: Target temperature is the same as the set temperature.
<p>No one in the room</p> <p>* When the sensor detects movements in the room which have been empty, it will resume operation to match with the activity level.</p>	<p>No one in the room for 20 minutes</p> <ul style="list-style-type: none"> • Cooling: Target temperature is 2 °C higher than the set temperature. • Heating: Target temperature is 2 °C lower than the set temperature. <p>No one in the room for 1 hour</p> <ul style="list-style-type: none"> • When no one is in the room for approx. 1 hour or more, the unit operates in the specified Absence operation mode. In the default setting, the energy-saving operation continues with the set temperature restricted. <p>No one in the room for 3 hours</p> <ul style="list-style-type: none"> • Cooling: Cooling will stop and the unit will be in fan only mode. • Heating: Heating will stop and the unit will be in fan only mode.
<p>Direct/Ind. airflow</p>	<ul style="list-style-type: none"> • Direct airflow: When the ECONAVI sensor detects a person, the unit swings wind up and down around where the person is present. • Indirect airflow: The unit avoids directly hitting wind at a person's body.
<p>Circulation (When using Panel for cassette (ECONAVI type) only)</p>	<ul style="list-style-type: none"> • Cooling: If the ECONAVI sensor detects high temperature of the floor while group-controlling, the "Circulation" (air circulation) is performed to alleviate the unevenness of temperature between near the ceiling and near the floor. • Heating: If the ECONAVI sensor detects low temperature of the floor, the "Circulation" (air circulation) is performed to alleviate the unevenness of temperature between near the ceiling and near the floor.

Note

- ECONAVI can be set using the separately sold ECONAVI panel or by connecting the holder on the wall.
 - Even when target temperature is changed through the ECONAVI function, the set temperature shown in the remote controller does not change.
 - Even when Cooling/Heating is changed to Fan through the ECONAVI function, the operation mode shown in the remote controller will still be Cooling/Heating.
 - It is possible to choose from the following options for the operation to be performed after a lapse of 3 hours since the room has been empty.
 - Operates in the Fan mode only.
 - Stops and resumes operations after human movements are detected.
 - Stops and will not resume operations even after human movements are detected.
 - Continues to operate in the current mode.
- If you need to do so, please contact the dealer.
- Turn the ECONAVI function OFF if:
 - You want to maintain the room temperature at a set temperature.
 - You want to keep air conditioner running while nobody is in a room.
 - The sensor fails.
 - Only infants, babies, or people only with disabilities are in the room.
 - When operating more than one indoor unit, the energy-saving effect may be reduced depending on the room condition.

Energy Saving

1 Display the menu screen.

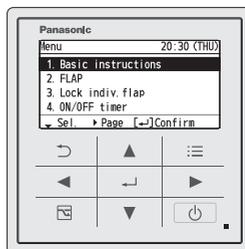

- To return to the previous screen

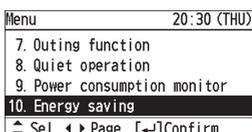

Press .

- To return to the top screen

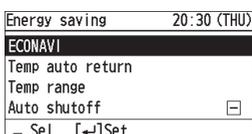

Press 2 times.

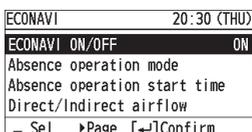

2 Select [Energy saving].

3 Select [ECONAVI].

4 Select the item to set.

Direct/Indirect airflow (Direct/Ind. airflow)

5 When ECONAVI is off, select [Yes].

6 Select [Setting for all units] or [Settings for individual units].

7 Set.

■ Setting for all units

(Press 2 times to finish.)

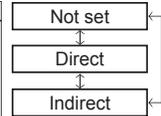

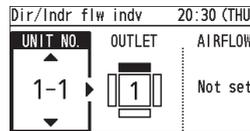

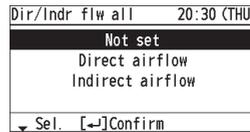

- [Not set]: Operation is performed with the set airflow direction without using the “Direct airflow/Indirect airflow”.
- [Direct airflow]: The unit swings wind up and down around where the person is present.
- [Indirect airflow]: The unit avoids hitting wind at a person’s body.

■ Settings for individual units

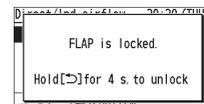

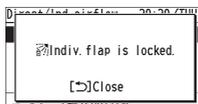

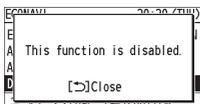

(Press 2 times to finish.)

- If the airflow direction of the selected air outlet is fixed, setting and changing are not available.

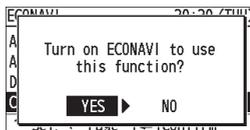

Note

- [ECONAVI] can be set only with the separately sold ECONAVI panel or holder on the wall, etc. or indoor units equipped with the “Direct airflow/Indirect airflow” function.
- [Direct/Ind. airflow] can be set on the remote control for each flap of the indoor unit.
(Only for the indoor units equipped with the [Direct/Ind. airflow] function compatible with ECONAVI)
- In the following cases, each message appears and this function cannot be used.
 - When the indoor unit is not supported, or the motion sensor is not equipped
 - When the airflow directions of the air outlets are fixed
 - Locked or prohibited

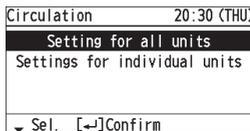

Circulation

- 5** Only when ECONAVI is off, select [YES].

- 6** Select [Setting for all units] or [Settings for individual units].

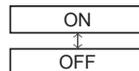

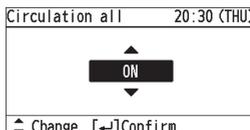

- 7** Set.

■ **Setting for all units**

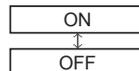

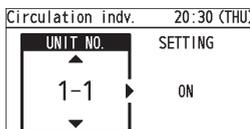

(Press 2 times to finish.)

■ **Settings for individual units**

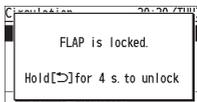

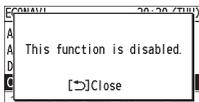

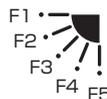

(Press 2 times to finish.)

Note

- To operate the “Circulation” in HEAT mode, set the fan speed to [AUTO], and set the airflow direction to any one of [Direct airflow], [↙] and [F3, F4, F5].
- In the following cases, each message appears and this function cannot be used.
 - When the indoor unit is not supported, the motion sensor is not equipped, or the floor temperature sensor is not equipped
 - Locked or prohibited

Energy Saving

■ Temp auto return

Restoring the changed temperature to the originally set temperature automatically after a specified time elapses. (e.g. Only when a guest comes)

■ Temp range

Restricting the temperature range that can be set. (Temperatures outside the range cannot be set.)

1 Display the menu screen.

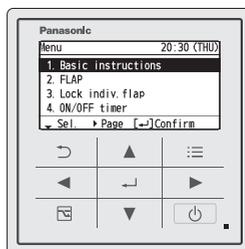

■ To return to the previous screen

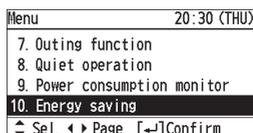

Press

■ To return to the top screen

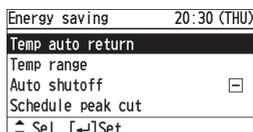

Press 2 times.

2 Select [Energy saving].

3 Select the item to set.

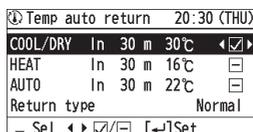

Temp auto return

4 Select the item and set to .

■ To operate only when energy can be saved

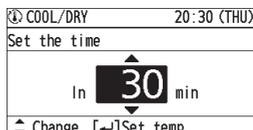

Select [Return type] with and select [Saving] with .

5 Set the time to return to the set temperature.

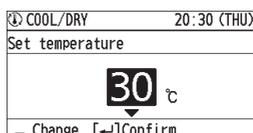

(10 to 240 min: by the 10 min)

6 Set the temperature.

(Press 2 times to finish.)

■ To set in series Repeat from step 4 without pressing .

Temp range

4 Select the item and set to [✓].

▲ ▼ → ◀ ▶ → [↵]

Energy Saving

Repeat off timer

This stops operation after a certain period of time each time operation is performed.

(e.g. When forgetting turning off)

(e.g. Setting to stop operation after 60 minutes)

1 Display the menu screen.

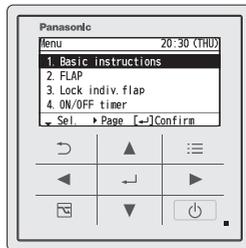

■ To return to the previous screen

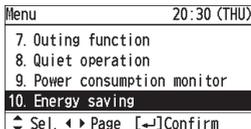

Press .

■ To return to the top screen

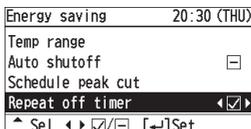

Press 2 times.

2 Select [Energy saving].

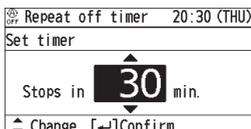

3 Select [Repeat off timer] and set to [✓].

4 Set the timer to stop.

(Press 2 times to finish.)

- 10 min to 180 min (by the 10 min)

Internal Drying Settings

1 Display the menu screen.

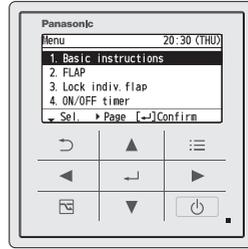

■ To return to the previous screen

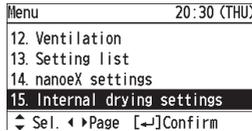

Press .

■ To return to the top screen

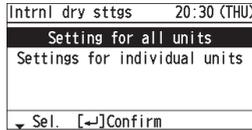

Press 2 times.

2 Select [Internal drying settings].

3 Select [Setting for all units] or [Settings for individual units].

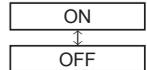

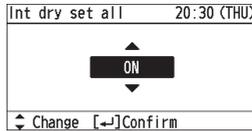

4 Set.

■ Setting for all units

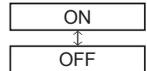

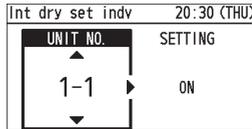

(Press 2 times to finish.)

■ Settings for individual units

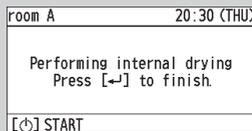

(Press 2 times to finish.)

To stop the internal drying operation

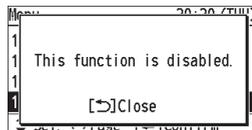

Press .

- If you wish to resume operating indoor units during internal drying, press .

Note

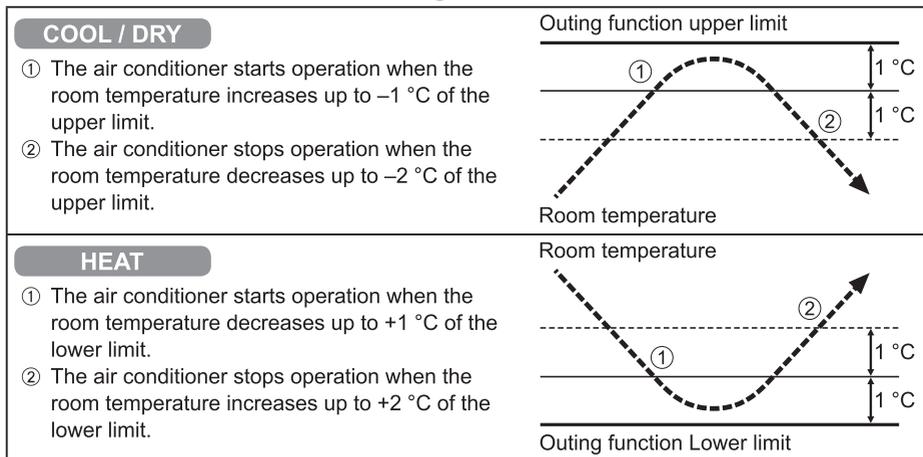

- If the function is not fitted, the display shown on the right appears and this function cannot be used.

Outing Function

This function prevents the room temperature from rising too high (or dropping too low) when no one is in the room due to outing, etc.

General Performance of the Outing Function

[Precautions]

- The outing control only starts/stops the air conditioner. It does not change the operation mode/temperature setting. Therefore, the operation mode/temperature needs to be set beforehand so that the outing function turns on the air conditioner with your desired operation mode/temperature setting.
- If the room temperature rapidly changes, the room temperature may get over the upper or lower limit when the outing function is activated.
- The outing function is invalid during FAN/AUTO operation mode.
- The air conditioner's stop order (stated in ② / above) is valid only when the outing function is operated.
If operated using other remote control unit (or a centralized control device such as a system control), the outing function does not work.

• Outing function indication

Outing function indication	Status
Off	The outing function is not set.
Flashing 	The outing function is now being set, or under operation.
Lighting 	Although the outing function is set, not under operation.

Note

- A remote controller loses outing function operation information when it is cut for more than Seventy-two hours during the outing function operation by electricity. It reverts from the blackout, and an air conditioner does not drive in outing function when operation is started. At this time, an air conditioner does not stop at outing function.

1 Display the menu screen.

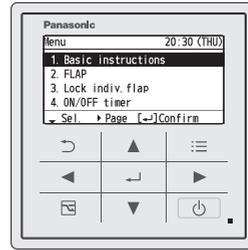

- To return to the previous screen

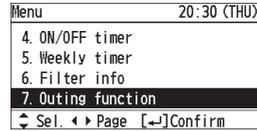

Press .

- To return to the top screen

Press 2 times.

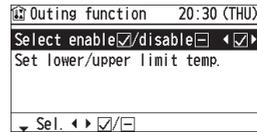

2 Select [Outing function]

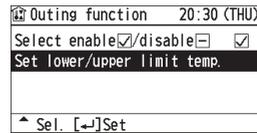

3 Select [Select enable/disable] and set to .

(Press 2 times to finish.)

Troubleshooting

If operation does not start by pressing ...

Check the following before asking for repair.

**When the [START/
STOP is prohibited.]
message is displayed**

- Being centrally controlled, operation is not possible.

Blackout?

- After recovery from blackout, press  again.
→ If operation does not start, turn off the circuit breaker and consult the dealer of purchase about the symptom and Model No.

**Is the circuit breaker
turned off?**

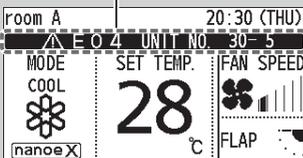

- Turn it on and press  again.
→ If operation does not start, turn off the circuit breaker and consult the dealer of purchase about the symptom and Model No.

**Is [Assigning]
blinking?**

- After blinking stops, press  again.
→ If operation does not start, turn off the circuit breaker and consult the dealer of purchase about the symptom and Model No.

Is  displayed?

Alarm indication (e.g.)

Defective indoor unit No.

- If any of the following alarm indications appears, stop operation once and restart approx. 1 minute later.
(Alarm indication, off)
[•E04 •E06 •P10 •P20 •H06]
→ If the indication does not reappear, use the unit.
→ If the indication reappears or an alarm indication other than the above (combination of numbers and characters such as E, F, H, L and P) appears, stop operation, turn off the circuit breaker and consult the dealer of purchase about alarm indication, Model No. and indoor unit No.

**Cannot stop the
operation.
Or the unit starts to
run automatically
even if  (Off) button
is pressed.**

- Check if the outing function is activated or not.

- Check control by central control device.

Troubleshooting

The remote controller screen displays a flashing “ ECONAVI”.

- Faulty sensor or incorrect installation.
→ Turn OFF the ECONAVI function with the remote controller and contact the retailer or point of purchase with the Model No. and problem.

The remote controller screen does not display the .

- The indoor unit has stopped. Turn on the indoor unit.
- The unit is in Fan mode. The ECONAVI function does not operate in Fan mode.
- The ECONAVI function is set to OFF. Turn the ECONAVI function ON with the remote controller.
- The indoor unit may not support the ECONAVI function. If you turn the ECONAVI function ON with the remote control but there is no change, the indoor unit does not support the ECONAVI function.
Please contact the dealer.

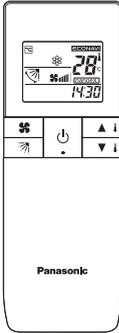

The remote controller screen displays “ nanoeX”.

- nanoe™ X is considered abnormal.
→ Turn OFF the nanoe™ X function with the remote controller and contact the retailer or point of purchase with the Model No. and problem.

- If you need to contact for servicing, check the back cover of the operating instructions for indoor units or outdoor units.

Specifications

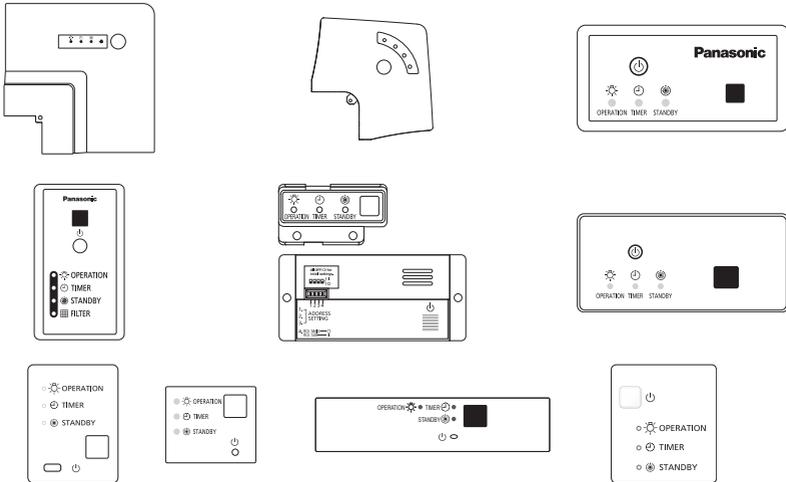

Model No.	CZ-RTC5B	
Dimensions	(H) 120 mm x (W) 120 mm x (D) 16 mm	
Weight	180 g	
Temperature/ Humidity range	0 °C to 40 °C / 20% to 80% (No condensation) *Indoor use only.	
Power Source	DC16 V (supplied from indoor unit)	
Clock	Precision	± 30 seconds/month (at normal temperature 25 °C) *Adjust periodically.
	Holding time	72 hours (When fully charged) *Approx. 8 hours are required for full charge.
Number of connected indoor units	Indoor unit: Up to 8 units (During group-controlling)	

Infrared Remote Controller

Installation Instructions Separately Attached.

Receiver

- Use this unit with the receiver that is separately sold.

English

Before operating the unit, read these operating instructions thoroughly and keep them for future reference.

Safety Precautions

WARNING

This symbol refers to a hazard or unsafe practice which can result in severe personal injury or death.

CAUTION

This symbol refers to a hazard or unsafe practice which can result in personal injury or product or property damage.

Matters to be observed

Prohibited matters

WARNING

Do not use this appliance in a potentially explosive atmosphere.

In case of malfunction of this appliance, do not repair by yourself. Contact the sales or service dealer for repair and disposal.

In case of emergency, remove the power plug from the socket or switch off the circuit breaker or the means by which the system is isolated from the mains power.

CAUTION

This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial use by lay persons.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

<for European market only>

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

- Do not operate with wet hands.
- Do not wash with water.
- Do not allow infants and small children to prevent them from accidentally swallowing the batteries.

Operating Precautions

- Do not locate in the following types of places.
 - Where there is moisture, oil, or vibration/In direct sunlight/Near heat sources/ Where condensation forms (These can cause malfunctions.)
 - Where there is rapid start fluorescent lighting or inverter lights near the receiver (This can cause incorrect operation.)
- Do not clean with benzene or thinners or wipe with chemical cloths. (This can cause discolouration or malfunction.)
 - When the unit is very dirty, dampen a cloth in water or warm water, wring thoroughly, and wipe.

-
- Read the Operating Instructions carefully for safe use. This manual describes the Operating Instructions of the infrared remote controller. Read this manual as well as operating instructions supplied with indoor units and outdoor units.
 - **Be sure to read the “Safety Precautions” (P.2, 3) before using.**
 - Keep this manual with operating instructions supplied with indoor units and outdoor units in a safe place.
 - Be sure to keep this manual in a place easily accessible by users. In the case of user change, be sure to give this manual to the new user.

NOTICE

The English text is the original instructions.
Other languages are translation of the original instructions.

Information for Users on Collection and Disposal of Old Equipment and Used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste.

For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

[Information on Disposal in other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

Supported Functions

Available functions vary depending on the model of the indoor unit and the combination of the optional equipment.

Also functions may vary even between indoor units of the same type if their capacities or manufactured years are different.

See the operating instructions of the indoor unit for the settable functions.

Some functions are not supported by the following receivers.

See the following table for the cases you have made an attempt to use the unsupported function.

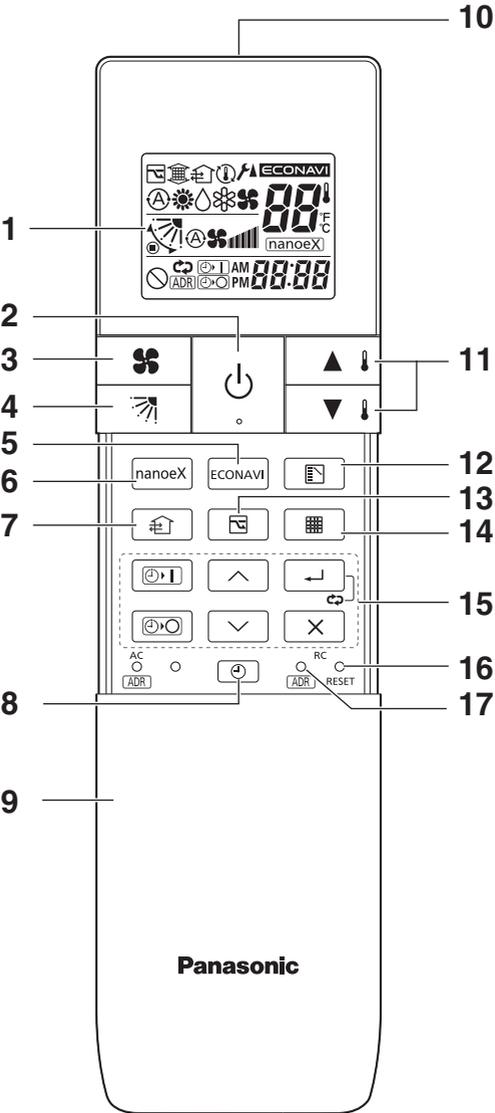

e.g. CZ-RWSU3 CZ-RWSU2N CZ-RWSC3 CZ-RWSD2
 CZ-RWST3N CZ-RWSL2N CZ-RWSK2

Unsupported function	Buzzer from the receiver	Result
Setting the fan speed in 5 levels.	Beeps	You can set fan speed to level 1, 3, or 5. (If you specify level 2, the fan speed will be set to level 1) (If you specify level 4, the fan speed will be set to level 3)
ECONAVI setting/ nanoe™ X setting/ Energy saving setting	Beeps	Setting is not applied.
Lock individual flap/ Temperature automatic return	Does not beep	Setting is not applied.

- It is possible to check whether the receivers support the functions above with the buzzer sound that is produced when  is pressed.
 - Supported: 2 short beeps
 - Unsupported: 1 short beep

Names and Operations

REMOTE CONTROLLER

1 remote controller can control a group of up to 8 indoor units.
(See page 28)

1. Operation Display

Displays the operation status.
(The figure shows all the statuses.)

2. Start/Stop button

Pressing this button once starts and pressing again stops the operation.

3. Fan speed button

Press to change the fan speed.

4. Flap button

Press to change the flap direction.

5. ECONAVI button

Press to set ECONAVI.

6. nanoe™ X button

Press to set nanoe™ X.

7. Ventilation button

Use this when connected to an aftermarket fan.

8. Clock button

Use this to set the clock.

9. Cover

Press at the top center and then slide down.

10. Transmitter

11. Temperature setting buttons

 raises the temperature setting 1 °C at a time.

 lowers the temperature setting 1 °C at a time.

12. Mode select button

Press to switch the operation mode.

13. Energy saving button

Press to enable or disable energy saving.

14. Filter button

Press to turn off the filter lamp on the receiver.

15. Timer setting buttons

 /  /  /  /  / 

Use for operating with a timer.

16. RC reset button

Use this button after changing the batteries.

17. RC address button

Press to set addresses.

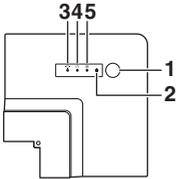

From this page, the names of remote controller's buttons will be indicated with the above illustrations.

E.g.: Start/Stop button → 

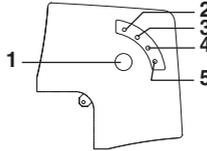

Names and Operations (Cont.)

Receiver

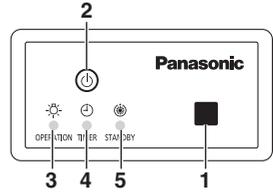

**CZ-RWRU3
CZ-RWRU3W
CZ-RWSU3**

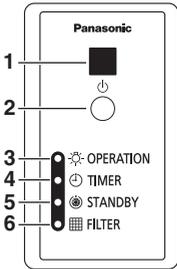

CZ-RWSU2N

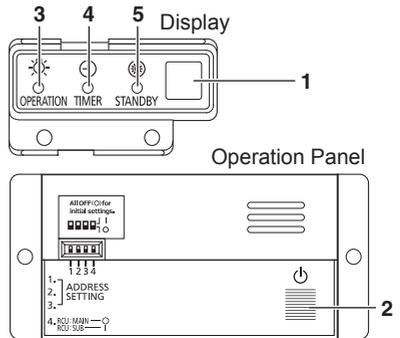

**CZ-RWRD3
CZ-RWSD2**

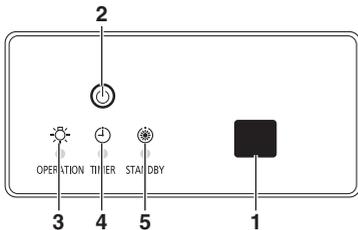

**CZ-RWRC3
CZ-RWSC3**

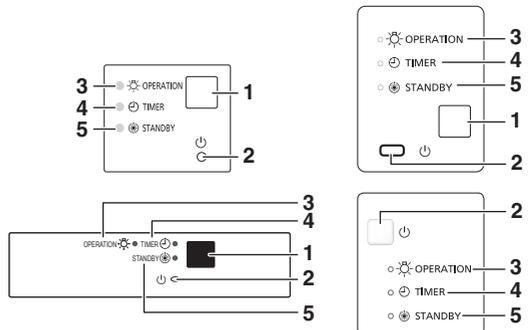

**CZ-RWRL3
CZ-RWSL2N**

**CZ-RWRT3
CZ-RWST3N**

**Build-in receiver on indoor unit
(Wall mounted type /
4-Way Cassette 60 × 60 type)**

1. Receiver

Receives the signal sent from the remote controller.

2. Emergency operation button

See page 12.

Indicator lamps

When an error occurs, one of the lamps flashes. When an indicator lamp is flashing, refer to "Troubleshooting".

3. OPERATION lamp

Lights up when the unit is operating.

4. TIMER lamp

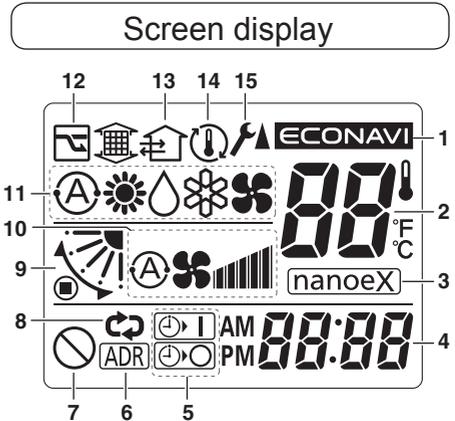

Lights up when the timer is set.

5. STANDBY lamp

The lamp in the HEAT mode lights up at the following times: during the startup, during the thermostat operation, and during the defrosting.

6. FILTER lamp

This lamp is for notifying you when the filter needs to be cleaned.

- 1 Appears when ECONAVI is being set to ON.
- 2 Indicates the set temperature.
- 3 Appears when nanoe™ X is being set to ON.
- 4 Displays the present time.
- 5 Timer program indication
 : The indoor unit starts operation at the programmed time.
 : The indoor unit stops operation at the programmed time.
- 6 Indicates the remote controller addresses are set.
- 7 Appears when the function is not available.
- 8 The ON timer or the OFF timer will operate repeatedly every day.
- 9 Indicates the flap position.
- 10 Indicates the fan speed.
- 11 Displays the selected operation mode. (AUTO  /HEAT  / DRY  /COOL  /FAN 
- 12 Energy saving operation is in process.
- 13 Appears when a fan available in the market is installed and is operating.
- 14 "Temperature Automatic Return" is set.
- 15 Appears when the setting screen is displayed.

Names and Operations (Cont.)

Emergency operation

Use [Emergency Operation]  in the following situations when there is an urgent need.

- When the remote controller's batteries have failed.
- When the remote controller is broken.
- When the remote controller is lost.

1. Press [Emergency Operation] of the receiver.

- The OPERATION lamp is lit.
- Auto operation starts. If Auto operation is not possible, the unit starts cooling if the room temperature at the time is 24 °C or higher; otherwise, the unit starts heating.
- The operation stops if you press [Emergency Operation]  again.

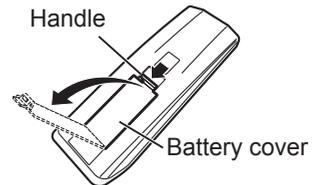

Note

- If non-cooling/heating free type is being used, it will beep twice and the operating lamp will light up on the display; if the timer and standby lamps blink alternately, a conflict between the heating and cooling exists, so the unit cannot operate in the desired mode. (On models that do not have an Auto function, even if Auto is selected, it works in the same way.)
- When the local operation is disabled by a central control device or similar cause, and if the Start/Stop , Fan speed , Flap , Temperature setting  / , Mode select  or Energy saving  button is pressed, the unit will beep 5 times and the change will not be made.

Installing Batteries

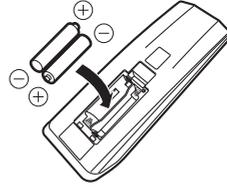

1. Remove the battery cover.

- Pinch the handle and open while pressing it towards the ▼ mark.

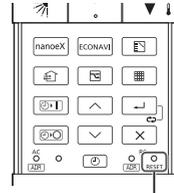

2. Insert two LR03 size batteries.

- Put the batteries in with the polarity [+/-] as shown in the figure.

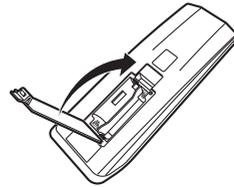

3. Gently insert one end of an unfolded paper clip (or a similar object that can fit) into the RC reset hole and press the RC reset button inside the hole.

- Take the batteries out and insert again if the time display is not “0:00” or “AM 12:00”.

RC reset button

4. Put the battery cover back on.

■ Notes on batteries

- The battery life is approximately 1 year.
- Reception may become poor or display on the remote controller fades when batteries are low.
- If the remote controller will not be used for a long period of time, remove the batteries. (In order to avoid a battery leak.)
- Emergency operations can be performed on the unit when the batteries run out. (See page 12)

■ Replacing batteries

- Replace both batteries at the same time with 2 LR03 size batteries.
- Do not use rechargeable batteries (NiCd, NiMH, etc.) because their size, shape, and some performance are different.
- Dispose of the old batteries at the designated sites in your community.
- The unit is restored with the factory setting when batteries are removed.
- After changing the batteries, reset the current time. (See page 14)

Setting the Current Time

1. Press  for 2 seconds or longer.

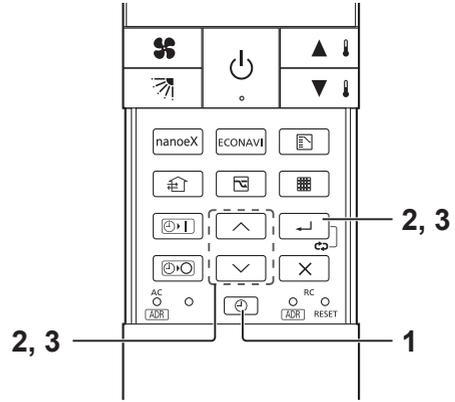

- The time display flashes. (The colon lights up.)

2. Press  /  to set the hour, then press .

3. Press  /  to set the minutes, then press .

Note

- If the buttons are not pressed for a certain duration while setting the time, the displayed time is set.
- Adjust the time periodically.

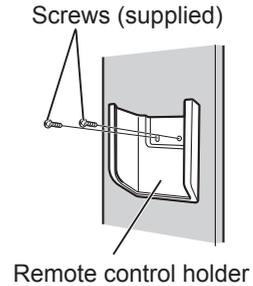

Using the Remote Controller

- Hold the remote controller with your hand and point its transmitter at the receiver. When the signal is received properly, it will beep.
- Signals can travel a direct distance of 6 metres. This distance should be used only as a guide. It depends on battery strength.
- Make sure nothing is between the remote controller and the receiver that could block the signal.
- Do not leave the remote controller in direct sunlight, where the wind from the air conditioner can blow directly on it, or near any other heat source.
- Take care not to drop, throw, or wash the remote controller with water.
- The signal from the remote controller may not be received in rooms with rapid start fluorescent lighting or inverter lights. For more information, please contact the dealer where the product was purchased.

Wall Mount Use

■ Mounting the holder

1. Fasten the remote control holder with screws.

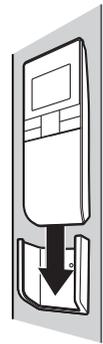

2. Slide the remote controller down into the holder.

- Press  from the location you wish to mount the remote controller and make sure the signal is received properly.

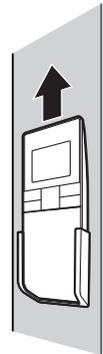

Note

- You cannot operate if the distance between the remote controller and the receiver is greater than that signals can travel.

■ Detaching the controller

1. Pull the remote controller up.

Paring Addresses

When more than 1 indoor units are installed in the same room with a compatible remote controller, addresses can be set up to avoid crosstalk. You can control up to 6 indoor units individually by the supported remote controller by pairing the address on the remote controller and the number on the address switch on the receiver.

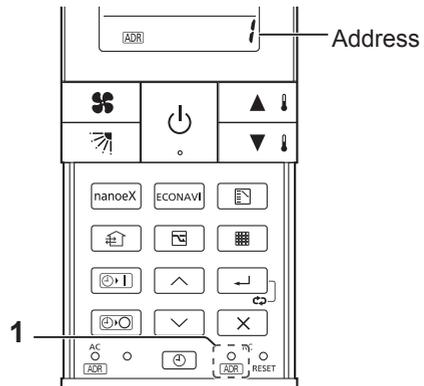

There are separate address settings: receiver addresses for the receivers, and transmitter addresses for the remote controller.

Units will not be controlled if the setting do not match.

Checking Addresses

1. Press  with one end of an unfolded paper clip (or a similar object that can fit).

- Its current address appears on the display for 5 seconds.
- If this address corresponds to the address of a receiver, the buzzer sounds. (If it is on ALL, the buzzer will always sound.)
- If it is on ALL, it can be operated regardless of receiver addresses. Point the remote controller at the receiver you wish to operate and transmit.

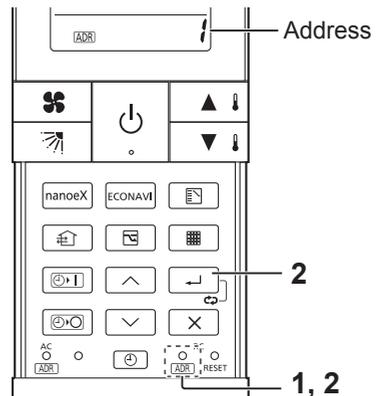

Matching Up Addresses

■ If not wall mounted type indoor unit

< Setting Remote Controller Addresses >

1. Press  with one end of an unfolded paper clip (or a similar object that can fit) for 4 seconds or longer.

- The current address number starts blinking.

2. Press  to select the address of the receiver you want to control, and press .

- Every time you press , it cycles from “ALL (All the addresses) → 1 → 2 → 3 → 4 → 5 → 6”.
- If it corresponds to the receiver’s address setting, the buzzer sounds.

Note

- Set the address of the receiver as instructed in the operating instructions of your receiver. Do not set by yourself. Contact the dealer where the product was purchased.

■ For wall mounted type indoor unit

< Setting the address of the indoor unit >

1. Press [Emergency Operation]  of the indoor unit for 4 seconds or longer.

- OPERATION lamp, TIMER lamp, and then STANDBY lamp repeatedly light one after the other for 1 second each to indicate the unit is ready for address setting.

< Setting Remote Controller Addresses >

2. Set the address for the remote controller following the procedure under the section “■ If not wall mounted type indoor unit” (see page 16).

- Repeat Step 2 under “■ If not wall mounted type indoor unit” if you are setting more units.
- The address setting ready status of the indoor unit ends if data transmission is not received from the remote controller for 3 minutes.
- Press [Emergency Operation]  on the receiver to end the address setting ready status of the indoor unit.

Operation

Hold the remote controller with your hand and point its transmitter at the receiver.

Power: Turn on the circuit breaker beforehand, referring to the operating instructions for the unit.

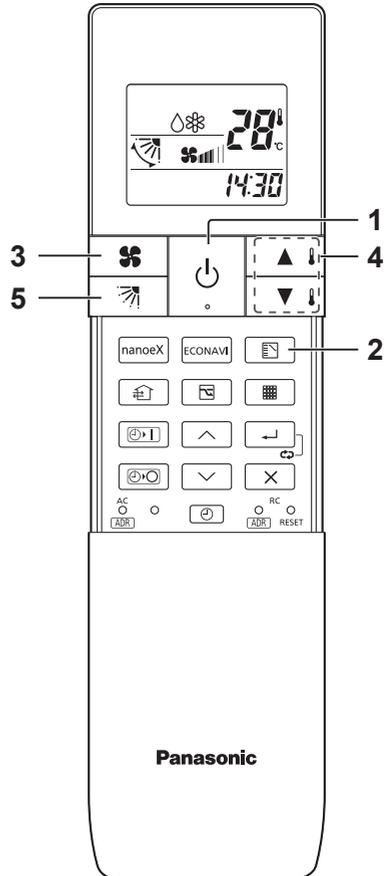

1. Press .

2. Press  to select the operation mode.

- Every time you press , it cycles from “Auto  → Heat  → Dry  → Cool  → Fan ”.
- Models that only provide the cooling function cannot operate in the Auto or Heat mode.
- The available functions differ depending on the indoor unit being used. See page 28 for how to change the operation mode display.

3. Press  to select the fan speed.

- Every time you press , it cycles from “ →  →  →  →  →   (Auto)”.
- Auto does not work in Fan mode.
- If the unit is not heating very effectively with a fan speed “”, switch the fan speed to “” or “”.
- The available functions differ depending on the indoor unit being used.
- “” is displayed if the function is not available.

4. Press / to set the temperature.

	MAX (°C)	MIN (°C)
Auto 	27	17
Heat 	30	16
Dry  / Cool 	30	18

- Temperature settings cannot be made in Fan mode.
- The temperature range that can be set varies depending on the model.
- The maximum temperature varies depending on the system and operating condition. See page 28 for how to change the maximum temperature.

5. Press to select the flap direction.

- Every time you press  , it cycles from “ →  →  →  →  →  (Swing) →  (Stop)”.
- If you press  again while the flap is swinging, you can stop the flap from swinging and set it in place as desired.
- When the unit is in heating standby, the flap (up-down wind direction plate) faces upwards.
- The available functions differ depending on the indoor unit being used.
- “ ” is displayed if the function is not available.
- **Never try to manually move the flap (up-down wind direction plate) that is operated by the remote controller.**

Stop: Press .

- If you cannot turn the air conditioner off in the normal way, disconnect the power to the indoor unit and contact the dealer where the product was purchased.
- When the unit is stopped with the remote controller, the fan on the outdoor unit may continue to run for a while.

< Auto operation >

It heats or cools automatically via the differences between the set temperature and the room temperature.

Auto operation is available only when identical refrigerant system inside all the indoor units or cooling/heating free-type are under control as 1 group. When using gas heat pump (GHP) air conditioners, contact the dealer where the product was purchased.

Lock Individual Flap

(Supported models: 4-way ceiling cassette type)

You can set the flap for each air outlet individually according to the room condition.

- Even if the flap setting is changed with  (P.19), the flap directions set here are not changed.

1. Press and at the same time for 4 seconds or longer.

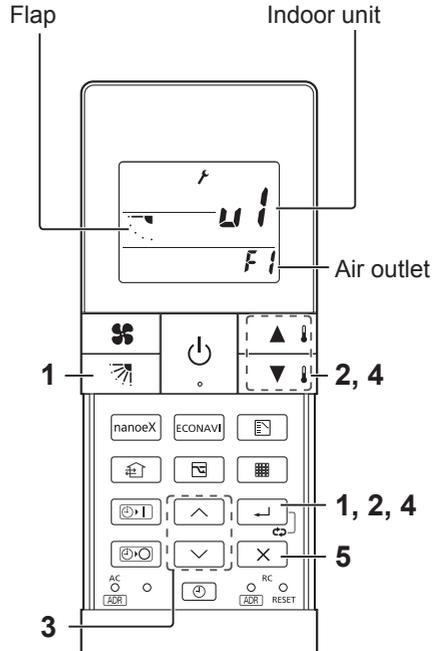

- “” starts blinking and the setting screen is displayed.

2. Press / to select the indoor unit to set, then press .

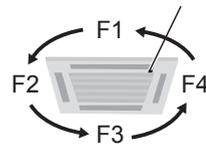

- Every time you press  /  to switch between “U1 ↔ U2 ↔ ... ↔ U8 ↔ AL (All indoor units that are connected to the remote controller)”, the buzzer sounds from the corresponding receiver.
 - When settable: 1 short beep
 - When not settable*: 1 short beep followed by 1 long beep
- * When the indoor unit is not connected or does not support this function.

3. Press / to select the air outlet.

- Every time you press  / , it cycles from “F1 ↔ F2 ↔ F3 ↔ F4 ↔ AL (All the air outlets)”.
- The square mark (indented ) on the panel of the indoor unit indicates air outlet No. 1. There are some models that do not have a square mark (indented ) .
- The air outlet No. changes according to the installation direction. Check by actual operation.

Square mark (indented )

4. Press / to select the flap direction, then press .

- Every time you press  / , it cycles from “ (Unlock) ↔  (Swing) ↔  ↔  ↔  ↔  ↔ ”.

5. Press .

- You can return to Step 2 to continue setting if you press  instead of .

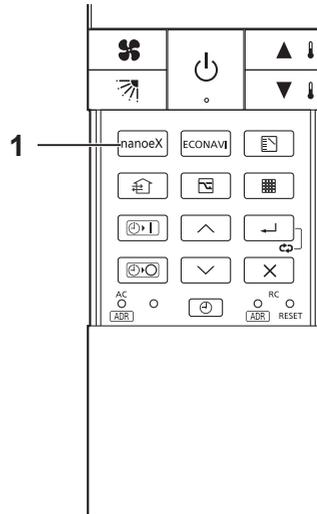

Note

- Press  to stop operation in the middle.

nanoe™ X Setting

1. Press during operation.

- You can toggle between ON and OFF each time you press .
- “” is displayed when this setting is ON.
- When the nanoe™ X setting is ON, “nanoe” (atomised water particle) is released from the indoor unit while in operation (Cool, Dry, Heat, Fan, Auto).
- If the receiver emits 1 short beep followed by 1 long beep after pressing , the indoor unit does not support this function. See page 30 for how to enable or disable the button.
- “” is displayed if the function is not available.

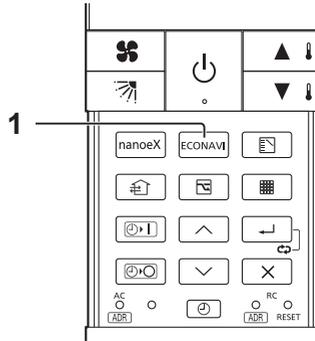

ECONAVI Setting

(ECONAVI can be set using the separately sold ECONAVI panel or by connecting the holder on the wall.)

1. Press during operation.

- You can toggle between ON and OFF each time you press .
- “**ECONAVI**” is displayed when this setting is ON. *
- The ECONAVI sensor detects human activity and conserves energy based on the activity level.
- Even when target temperature is changed through the ECONAVI function, the set temperature shown in the remote controller does not change.
- When operating more than 1 indoor unit, the energy-saving effect may be reduced depending on the room condition.
- If the receiver emits 1 short beep followed by 1 long beep after pressing , the indoor unit does not support this function. See page 30 for how to enable or disable the button.
- “” is displayed if the function is not available.
- * “**ECONAVI**” is not displayed in Fan mode.

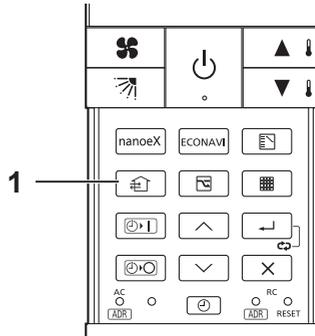

Ventilation Setting

(When connected to an aftermarket fan)

 button is disabled as the factory setting. Enable the  button if you have connected the ventilation fan. (See page 30)

1. Press .

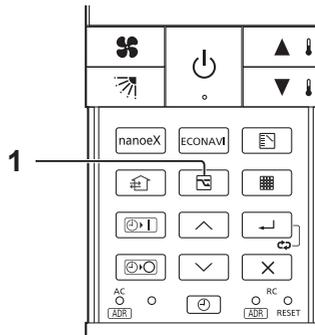

- You can toggle between ON and OFF each time you press .
- “” appears on the display of the remote controller when the fan is operating.
- When the air conditioner is started or stopped, the fan starts or stops at the same time.
- “” is displayed if the function is not available.

Energy Saving Setting

1. Press during operation.

- You can toggle between ON and OFF each time you press .
- “” is displayed when this setting is ON.
- The energy saving operation restricts the maximum current value, resulting in decreased cooling/heating performance. (If the current of outdoor units does not reach the peak due to low load operation, the current value is not restricted.)
- If the receiver emits 1 short beep followed by 1 long beep after pressing , the indoor unit does not support this function. See page 30 for how to enable or disable the button.
- “” is displayed if the function is not available.

Temperature Automatic Return

You can restore the changed temperature to the originally set temperature automatically after a specified time elapses.

- Set the time and temperature for each operation mode.

1. Press  and  at the same time for 4 seconds or longer.

- “” starts blinking and the setting screen is displayed.

2. Press  to select the operation mode, then press .

- Every time you press  to switch between “Dry  / Cool  → Heat  → Auto (A)”, the buzzer sounds from the corresponding receiver.
 - When not set: 1 short beep
 - When already set: 2 short beeps

3. Press  /  to set the time to return to the set temperature.

- Setting range: 10 to 240 min (by the 10 min)

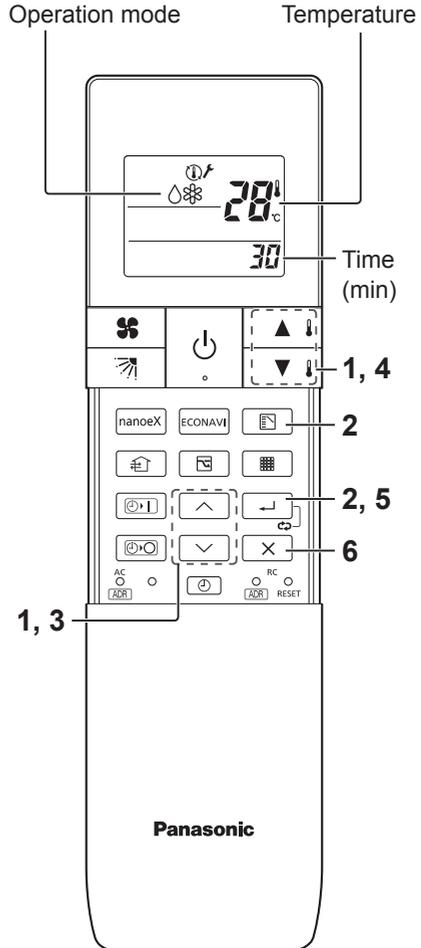

4. Press  /  to set the temperature, then press .

	MAX (°C)	MIN (°C)
Auto (A)	27	17
Heat 	30	16
Dry  / Cool 	30	18

- The temperature range that can be set varies depending on the model.

5. Press .

- You can return to Step 2 to continue setting if you press  instead of .

Changing the setting

Perform Step 1 to 5 (P. 24) as you did when setting.

Cancelling the setting

1. Press  and  at the same time for 4 seconds or longer.
2. Press  to select the operation mode, then press  for 4 seconds or longer.
 - The receiver emits 1 short beep.
 - Press  for 10 seconds or longer to cancel settings for all operation modes.

Note

- Press  to stop operation in the middle.

Timer Operation

- When setting the timer, make sure the current time on the remote controller is accurate.
- The timer's clock can only be set when the display of the remote controller is ON.
- After setting the timer, put the remote controller for in a place where its signal will reach the receiver of the indoor unit.

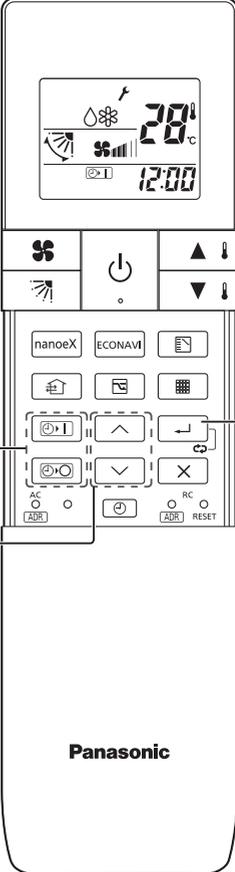

1. Press or twice.

- The time last set on the timer starts blinking. (“- -: - -” blinks when the timer is not set or after replacing batteries.)

2. Press / to set the timer to the desired time.

- Every time you press  / , the time changes in 10 minute increments.
- If you press and hold the button, the time changes quickly.

3. Press .

- The timer display stops blinking and the display reverts to the current time after 3 seconds.
- “ / 

The diagram shows a Panasonic remote controller with a digital display and various function buttons. The display shows a temperature of 28°C and a time of 12:00. Three numbered callouts point to specific buttons:

 - 1 points to the timer icon button.
 - 2 points to the up and down arrow buttons.
 - 3 points to the confirm button.

The remote controller features a display at the top showing icons for fan, snowflake, and a battery level indicator. Below the display are buttons for fan speed, power, and temperature adjustment. Further down are buttons for nanoeX, ECONAVI, and a list icon. Below these are buttons for home, mail, and a grid icon. The bottom section contains buttons for timer (timer icon), up/down arrows, and a confirm button. At the very bottom are buttons for AC, RC, and RESET.

Combining ON and OFF Timers

1. The ON and OFF timers can be set respectively.

Checking the timer setting

1. Press  or .

- The scheduled time is displayed for 4 seconds.
- When the timer is not set or after replacing batteries, it displays “- -: - -”. (Initial setting)

Changing a timer setting

1. Perform Step 1 to 3 (P. 26) as you did when setting.

Canceling a timer setting

1. Press .

- If you wish to cancel the setting for either the  or the  timer, press  while the scheduled time is displayed.

Using the same timer setting every day

1. Press  for 2 seconds or longer.

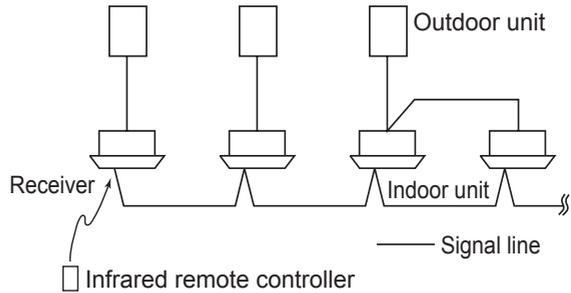

- “” is displayed when set.
- If you press  again for 2 seconds or longer, “” goes off and the timer operates only once.

Operating Multiple In/Outdoor Units Simultaneously

(Group control)

Group control works well for providing air conditioning to 1 large room with more than 1 air conditioning units.

- 1 remote controller can operate up to 8 indoor units.
- All the indoor units have identical settings.
- Set temperature sensing to the indoor unit (Main sensor). (See page 8)

Miscellaneous Settings

A variety of changes can be made to settings, depending on the indoor unit being used.

Operation mode indicator, time display (24-hour, AM/PM), heating maximum temperature

- These settings are saved in nonvolatile memory in the remote controller, so even when its batteries are changed, the settings do not have to be made again.
- First check the display of the remote controller when the unit is stopped and then make any desired settings.

< How to Operate >

- While holding down the buttons below, the remote controller's display changes every time  is pressed.
- Whatever is being displayed when you release  is set.

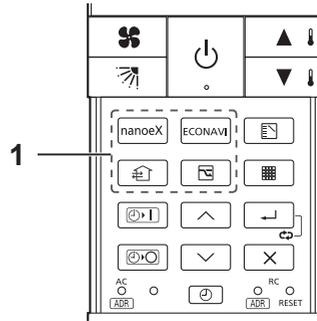

Setting Item	Operation Button	Setting Content	Remote Controller Display
Remote controller operation mode display setting when  is pressed	Press  while pressing 	Heat Pump (with Auto)	    
		Heat Pump (without Auto)	   
		Dedicated air conditioner	  
Clock display setting	Press  while pressing 	24-hour	23:59
		AM/PM	PM 11:59
Max possible temperature setting in the Heat mode	Press  while pressing 	Maximum heating temperature range is 26 °C – 30 °C	26 → 27 → 28 ↑ 30 - 29 ↓

Button Control

You can enable or disable the following buttons for some indoor units.
nanoe™ X, ECONAVI, Ventilation, Energy saving

1. Press the button for desired setting for 4 seconds or longer.

- You can toggle between enable and disable each time you press the button for 4 seconds or longer.
- “” is displayed when you press a disabled button, and the function cannot be used.

Buttons	Setting content
	Enabling or disabling the button for nanoe™ X.
	Enabling or disabling the button for ECONAVI.
	Enabling or disabling the button for ventilation.
	Enabling or disabling the button for energy saving.

Troubleshooting

Before requesting service, please check the following.

Problem	Cause	Solution
The unit doesn't work even when  is pressed on the remote controller.	The power to the indoor unit is not ON.	Make sure the power to the indoor unit is ON.
	Are the remote controller's batteries dead?	Change the batteries.
	Is there a mismatch between the display lamp and cooling/heating or is it set to something other than Auto? (The operating lamp stays lit, while the timer lamp and the standby lamp blink alternately.)	Change the operating mode.
	Do the addresses match one another?	Check the addresses of the receiver and the remote controller. (See page 16)
The air conditioner starts and stops on its own.	Has the timer been set to repeat?	Check the timer settings. (See page 26)
Although the unit is for air conditioning only, either Auto or Heat is indicated in the display.		Make settings to the remote controller's operation mode display. (See page 28)
After the batteries are put in the remote controller, even when it is operated, the display does not change.		Press the RC reset button on the remote controller. (See page 13)
The timer cannot be set.		Make the settings when the remote controller is in Operation Display. (See page 26)

If the problem persists even after you check the foregoing items, stop the unit, disconnect the power to the indoor unit and contact the dealer where the product was purchased with the model number and problem you are having. As it is dangerous, under no circumstances should you undertake repairs yourself. Further, when the receiver's lamps are blinking; please contact your retailer with that information.

Specifications

Model No.	CZ-RWS3
Dimensions	(H) 165 mm X (W) 59 mm X (D) 22 mm
Weight	100 g (Batteries and remote controller holder are not included)
Temperature/ Humidity range	0 °C to 40 °C / 20% to 80% (No condensation) *Indoor use only.
Power source	Two LR03 size batteries
Clock Accuracy	±90 seconds per month (at 25 °C)
